

FX-928 is easily screeded by hand into place ready to finish.

Mr. Jim Brown, Maintenance Contract Supervisor of Maryland D.O.T., assures that reinforcing steel is in proper position before FX-928 is placed.

Mr. Ron Molesworth, Superintendent of Concrete General, Inc., repaired deteriorated sidewalk by skin patching with FX-928. He remarked that with the use of FX-928, the reduced amount of water was helpful when used in remote areas.

Mr. Carl W. Scheffel, Vice President & Chief Engineer of Fox Industries, checks FX-928 patch before opening lane to traffic. FX-928 achieves 2800 psi in compressive strength in one hour.
