

Close up view of FX-70-6 Epoxy Grout being poured using special fiberglass funnels manufactured by Fox Industries. **Note:** Flange constructed at top of jacket facilitates placement of grout into 1/2" annular void.

FX-70-6 Hydro-Ester® Pourable Grout displaces water and bonds tenaciously to both pile and jacket.

Jackets were inspected in 2002 and found to be performing as intended.

Close up view showing FX-70® System in excellent condition after 20+ years of service.
